

UHF USB Encoder

Model Number: ST-6001

General Description

ST-6001 is high performance UHF reader and writer, and the reading distance up to 20cm. It supports fast tag read/write with high identification rate. The reader is widely used in RFID system such as logistics, vehicle access control, and anti-counterfeit and industrial production process control system.

ABS body, Colorful light, flashing when reading card, logo customized is available

Order List

Model	Interface
ST-6001U	USB
ST-6001K	USB emulate keyboard stroke(only read)

Technical Specifications

Frequency	902~928MHz (US) / 865~868MHz(EU)
Protocol	ISO18000-6C(EPC GEN2)
Interface	USB
Operating mode	USB read-only/read-write mode USB virtual serial port output USB virtual keyboard output
RF power	0-17dbm(adjustable)
Reading distance	0~35cm (Depends on tag type and application environment)
Power supply	5V
Specification	Size: 85*125*18.8mm / Weight: 86.5g
Material	ABS , can customize silk screen logo
Packing	Size: 150*150*35mm / Weight: 230g
Operating temperature	-10~+65°C
Storage temperature	-25~+80°C

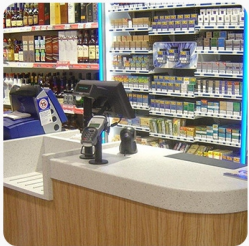

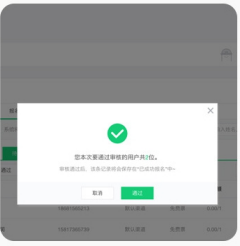

Interface definition

USB interface supports 3modes		
		
<p>read-write mode Data programming and password or mask authorization for tags</p>	<p>Virtual serial port output Realize serial port data transmission through the serial port debugging assistant</p>	<p>keyboard emulation output Plug and play, optional EPC/TID area, can receive tag number through word/excel/notepad and other text formats</p>

Application

			
<p>Cash register system</p>	<p>Membership Card System</p>	<p>Personnel attendance system</p>	<p>Label Issuance Authorization System</p>
